

## Birthday Bash Review and Giveaway: Citiblocs Build Anything!

[Citiblocs](#) are wooden planks children (& adults) use to create a truly endless amount of possibilities, from ships to castles to animals, anything you can imagine! Every Citibloc is exactly the same shape and size. Because of the perfect cut of each block, the only thing needed to hold them together is gravity and balance. [Citiblocs](#) facilitate "reasoning, problem solving, cause & effect, engineering and improvising". Because of the open-ended possibilities, toy professionals have honored Citiblocs with many awards including the [iParenting Media Award](#) 2009 Outstanding Product and [Dr Toy](#) Best Vacation product for Summer Award.

If you have ever shopped for building sets or blocks, you know how costly they are. Citiblocs' kits are affordable, starting at \$14.99 for their 52 Piece Wooden Builder Set. The planks are crafted from New Zealand Pine and are light weight, but appear to be extremely durable.

My daughter loves assembling and building just about anything. She has always loved Legos and has a wonderful imagination building with her blocks. She even builds with every day items such as board books or her bins from her toy organizer. When I was presented with the opportunity to review [Citiblocs](#), I knew I had to do it because I had a feeling my daughter was going to enjoy them!

When we received the basic starter set, the [52 Piece Wooden Set](#), my daughter immediately dumped them out on her bedroom rug. She tried building on her rug, but found they work better directly on our hardwood floors. The first thing she made was a slide, but then she put all her time and effort into building bridges. She really has to focus when she stacks them to avoid tipping her structures over. I like that it challenges her and she seems to like it too. Citiblocs are perfect for on the go because they are light weight and much more compact than traditional block sets. This is a set that she will enjoy for many years to come.

You can purchase Citiblocs at Toys 'R Us and online at [CitiblocsStore.com](#), TRU.com, GlammaToys.com and at specialty toy retailers. Teachers receive 10% off the regular selling price at [CitiblocsStore.com](#). Also, check out their Citiblocs [educational manual](#) with lesson plans!
