

## Green Gifts for the Holidays

“Well we couldn't have a Christmas prime time show without spending a little time talking about gifts. So Barbara and Tina from MetroMoms have hand-picked the Best & Hottest Toys for babies and kids that are educational and eco-friendly.”

“Oh my gosh, I love the spread of toys you brought. But, as I said before, you have very high standards when selecting these toys. What kind of criteria did you pay attention to?”

“We were looking for natural toys, things that are made with non-toxic materials, also products that teach children how to be eco-friendly and green as well.”

“CitiBlocs This is made from New Zealand Pine. You can say goodbye to plastic, and use your creativity to build.”

“Either one person, or the entire family, can take part in this, and have fun tearing it down.”

“How cool is that!”
