CitiBlocs: Towering Over Plastic Blocks

Citiblocs

[CitiBlocs](#) are a pretty simple concept, but the execution is actually high tech! Crafted from smooth New Zealand pine, each block is shaped precisely with clean edges for a perfect fit. Sets range from [52 blocks](#) (just \$15) to [1000 blocks](#) (\$230) and each comes with a how-to booklet that has some of the coolest-looking structures I've ever seen. My 4-year-old son and I played with a [100-block set](#) (\$28) and were able to make a really tall tower with pieces left over. Overall I loved the retro feel and the appeal of high-quality wooden toys never gets old for me.
