

blockhead

When it comes to stimulating the imagination, there are no better instruments than pots and pans, and no better building blocks than the old-school wooden kind. If you're in search of the latter, we're sold on Citiblocs. Each piece is exactly the same shape and size (precisely cut from certified renewable Radiata Pine), which means no glue or connectors are needed to keep creations in place. Gravity plus balance equals perfect stackability! From \$15, [Citiblocs](#).
